

**PUBLIC NOTICE
OF
PROPOSED SOIL AND GROUNDWATER CLEANUP**

In accordance with Arizona Administrative Code R18-12-264.01, the Arizona Department of Environmental Quality (ADEQ) is providing notice that a Corrective Action Plan (CAP), submitted by Honeywell on November 15, 2004, has been proposed for the remediation of soils that have been contaminated with petroleum, including the removal of free product, resulting from leaking Underground Storage Tank (UST) systems at the following facility:

**LUST No. 0393.02 - .10
Facility ID No. 0-002227
Maricopa County**

**Honeywell
111 South 34th Street
Phoenix, Arizona 85034**

Bio-enhanced Soil Vapor Extraction and Free Product Pumping

Existing soil and free product contamination at the referenced site will be remediated using a bio-enhanced soil vapor extraction system and portable free product pumps. During bio-enhanced soil vapor extraction, two different remediation processes occur: 1) Air is injected into the contaminated soil, with the increased oxygen stimulating existing bacteria, which use contaminants as their food source. 2) Soil vapors are extracted from the contaminated area and treated at the surface as required by applicable laws. In free product pumping, portable pumps are lowered into monitor wells and the product is pumped to the surface and disposed of as required by applicable laws. To evaluate the effectiveness of these remediation systems, periodic monitoring of contaminant levels will be required by ADEQ. Once contaminant levels decrease to below cleanup standards, the site may be eligible for closure.

Copies of the CAP are available for review during normal business hours at the ADEQ Records and Library Review Area, 1110 W. Washington Street, Ste. 140, Phoenix, AZ 85007, and at the following Phoenix public libraries; Burton Barr Central Library, 1221 North Central Avenue and the Saguaro Branch Library, 2808 North 46th Street. ADEQ encourages public participation in UST corrective actions and welcomes comments on the proposed CAP. A public comment period is in effect from February 28, 2005 through April 6, 2005. Comments should be submitted in writing by April 6, 2005, to ADEQ Tank Programs Division, Corrective Action Section LUST Enforcement Unit, and Attention: Mark Lucas, 1110 W. Washington Street, Phoenix, AZ 85007. If sufficient public interest has been demonstrated during the public comment period, ADEQ will announce and hold a public meeting. ADEQ will respond to comments in writing, following the public comment period. For more information on this notice, please call Mark Lucas at (602) 771-4297 or (800) 234-5677, ext.4297.
